ABSTRACT

Characteristics of students in South Carolina schools are provided for the 91 geographic school districts and the special schools and districts funded through the Department of Education. Within the districts, schools are arranged alphabetically. The sex distribution and racial and ethnic compositions of students in each school are provided. School attendance is described in terms of rural, urban, or mixed. Student average daily membership counts were rounded at the school level; totals may vary from the source documents due to this rounding. In the 1989-90 school year, the Department of Education funded 417,754 students at the elementary level, 195,951 students at the secondary level, and 1,202 students in combined level schools. Approximately 42% of the membership was made up of minority students and 49% of the membership was made up of female students. Direct instructional services were rendered to students by 35,629 full-time equivalent teachers. Approximately 13% of all secondary-level students were served by 49 area vocational centers that specialized in occupational training. Excluding all special schools, the smallest school had a membership of 10 students, and the largest high school had a membership of 2,549 students. Forty-two pages of tabulated data, a glossary of terms, and a list of source documents are included. (SLD)

INTRODUCTION

Pupils in South Carolina Schools was designed to answer questions concerning students by grade in each of the 91 public school districts and those special schools and districts as funded through the Department of Education. Within these districts, schools have been arranged alphabetically. For the past eleven years, the educational characteristics in this document have been presented in essentially the same format. Care should be taken when comparing previous years data to current data due to school consolidations, reorganizations, or discontinuations. The sex and racial/ethnic composition of students in each school is given for those interested in preparing studies concerning these areas. Additionally, each school attendance description is given in terms of rural, urban, or mixed. Student average daily membership counts were rounded at the school level, and totals may vary from the source documents due to this rounding procedure.

For the 1989-90 school year, the South Carolina Department of Education funded 417,754 students in elementary-level schools, 195,951 students in secondary-level schools, and 1,202 students in combined-level schools. Approximately 42 percent of the public school membership was minority, and 49 percent was female. Direct instructional services were rendered to pupils by 35,629.3 full-time equivalent teachers. Approximately 13 percent of all secondary-level pupils were served by 49 area vocational centers which specialized in occupational training.

Excluding all special schools, Sumter High School, Sumter School District 17, was the largest high school with a membership of 2,549. Mary C. Fields (Daufuskie) Elementary School, Beaufort School District, was the smallest school with a membership of 10. Of all schools, Cross Anchor Correctional Institute and Dutchman Correctional Institute within the Palmetto Unified District were the smallest, serving only six (6) students each on an average daily basis.

A Glossary of Terms and source documents which were used in the compilations are presented in the last four pages. Users are urged to review these along with the pupil information. If further information or clarification is needed, please contact:
